

MEET THE BIG BOSS OF OUR FAMILY OF MACHINES: THE SPIRIT

The Spirit offers extreme precision no matter what you throw at it. A state of the art multiple boiler machine equipped with well-considered ergonomics and developed for the demands of very high-traffic espresso bars.

TECHNICAL FEATURES

- Equipped as standard with two external pumps: coffee and steam/hot water systems are fully separate
- Shot timers in full view, right above each group
- Illuminated rear panel to highlight your Spirit or custom logo
- Intuitive operation by dual volumetric levers or touchpad, also programmable for manual operation
- Auto-back-flush program
- One separate PID temperature controller for each boiler, displays in full view
- Energy saving Eco mode on each temperature controller, for nights and/or weekends
- Non-spattering, energy saving hot water delivery system, adjustable quantity
- Drip tray quickly adjustable in height, optionally a raised tray for espresso cups is available
- Filter holders in stainless steel with KvdW handles
- Heat neutral polymer dispersion bloc: no loss of heat and no baking-on of oils and fats
- Entire frame in stainless steel
- Large steam boiler capacity: 10.5 litres for the Duetto, 19.5 litres for the Triplette
- Large coffee boiler capacity: each 2.1 litres
- Rubber group gaskets remain flexible forever, do not become hard or brittle
- Membrane-type group screens

OPTIONAL:

- Foot-activated steam valve(s)
- One pump per group
- Idro-Matic, adjustable progressive pre-infusion cylinders inside group
- Custom logo/decoration at illuminated rear panel
- Group caps, filter holder handles, steam valve and lever knobs in ivory colour
- Any RAL colour for frame or body, or non-painted ("Raw")
- Polished stainless body work
