MIRAGE

## MEET THE LATEST MEMBER OF OUR FAMILY OF MACHINES: THE MIRAGE SLIM JIM

This machine combines features from both our classic Mirage and high-end Spirit. The Mirage Slim Jim carries our signature in its looks and continues our tradition of performance and build quality.

### TECHNICAL FEATURES

- Multiple boiler system: steam boiler plus one boiler per group, all with temperature control by PID
- Each group fed with water pre-heated to target temperature via a high capacity self-regulating thermo-syphon loop / heat-exchanger
- Actual water temperature in each group is clearly shown using 3-digit 1 inch display
- Two-stage progressive pre-infusion cylinder per group
- Pressure gauge per group showing actual extraction pressure at the puck
- Shot timer per group
- Drip tray easily adjustable in height
- Two hot water selections; metered tea water and manual boiling water
- Powerful, insulated steam boiler
- All stainless steel construction. Next to the frame, this includes the steam boiler, coffee boilers, groups, pump, manifolds, solenoid valves and fittings
- Active cup warmer with adjustable temperature control
- Ergonomic design, with all necessary feedback for the barista clearly shown
- Automatic back-flush program
- Automatic day/week ECO mode
- Filter holders in stainless steel with KvdW handles in black or ivory colour
- Heat neutral PEEK dispersion block: no loss of heat and no sticking on of oils and fats

### FUNCTIONAL AS WELL AS A VAST ARRAY OF APPEARANCE OPTIONS:

- Dual volumetric Bastone levers. Also programmable for manual operation
- Several types of legs, customisable with any RAL colour
- Body in any RAL colour, non-painted ("Raw"), or polished steel
- Many types of side panels, including custom logo's and colours
- Group caps, filter holder handles, Bastone knobs, steam knobs in black or ivory colour
- Foot activated steam valves
- Several styles of front panels
- Several types of cup rails
- Cup warmer awning

### VIRTUALLY ENDLESS CUSTOMISATION POSSIBILITIES

Next to their high build quality and strong performance in extraction and steam, our machines' main distinction has been -since 1984- their design. With this latest model we have exploited our experience in this field to its full extent. The Slim Jim has a wide range of visual options meaning that everyone can now have their own bespoke machine, be it an aspiring espresso bar owner or a chain of shops. Many different, visually defining parts can be chosen; legs, front panels, side panels, cup rails, colours, awnings, colour of knobs/handles, group caps, and so forth. Furthermore, all parts are interchangeable allowing the Slim Jim to evolve or adapt over time.
